

BALANCED TECHNOLOGY MANGEMENT CEU'S

All of the webinars have Approved Provider Status for Continued Education Unit (CEU) provision.

The Technology Management series 3-day course offers certification in *Balanced Technology Management* (BTM). What that means is that you are qualified to facilitate Technology Management initiatives in your school district, health office, social services department, etc.

BTM initiatives are vast and could include better playgrounds, free recreation passes, Tech Bans in schools or clinics, longer recesses, Tech Unplugs etc.

BTM certification also qualifies recipient to provide educational information contained in the *Tech Tool Kit* to students, parents, teachers and clinicians.

BTM certification for teachers provides necessary training to supervise the teen Screenbuster program where teens take the Reconnect Webinar 5-hour, free training online and then go into classrooms for 15 minutes every week to talk to kids about Screens.

The BTM certification logo would go under your name on your email contact, letterhead, correspondence, brochures etc.

Reconnect Webinars plans to have one BTM certified adult for every school, health unit, any government department that provides assistance to children and families etc.

The ways in which we are raising and educating children with screens is not sustainable. The time to act is now. Join the Reconnect Webinars Balanced Technology Management team and advocate for children's rights to be healthy, happy and able to learn.

Please let me know if you have any additional questions at crowan@reconnectwebinars.com.

Yours in spirit,
